

Microbiology
Unit Three Vocabular Terms

C9

Biotechnology
DNA vector
Recombinant DNA
Restriction enzyme

C14

Commensalism
Convalescence
Disease
Epidemiology
Etiology
Fomites
Incubation period
Mutualism
Normal biota
Nosocomial Infections
Parasitism
Pathogen
Prodromal period
Reservoir of infection
Signs
Symbiosis
Symptoms
Syndrome

C15

Collagenase
Cytopathic effects
Endotoxins
Exotoxins
Hyaluronidase
Kinases
Pathogenicity
Portal of entry
Sidophores
Superantigens
Toxins
Virulence

C16

Adaptive immunity
Chemotaxis
Complement
Diapedesis
Formed elements
Immunity
Inflamation
Innate immunity
Lymphatic system
Toll Like Receptors
